DF-10 CV

Strap Dispenser and Tool Balancer for Steel or Polyester Strapping

Signode, the leader in industrial packaging solutions is committed to improving your productivity and profitability through innovation.

DF-10 CV is the latest in the range of dispensers and incorporates a tool balancer.

Features and Advantages

- ✦ Easy to operate, improves productivity
- ✦ Versatile design for high functionality
- ✦ Dispenser considerably reduces strap wastage
- ✦ Tool balancer improves productivity, reduces tool damages and operator fatigue
- ✦ Filter – Regulator – Lubricator attachment for pneumatic tools improves tool efficiency and life
- ✦ Safe - brake attachments for strap removal and immobilizing front wheels
- ✦ Mobile - provides packaging flexibility

DF-10 CV

Strap Dispenser and Tool Balancer for Steel or Polyester Strapping

Strapping dispensers are required for efficient strapping operations whether it is with manual/pneumatic/battery operated combination tools. Strap pre-cuts and resultant wastage can be eliminated by loading strap coil directly into the dispenser.

The tool balancer and filter, regulator and lubricator (FRL) attachment increases productivity, reduces tool damage and operator fatigue.

DF-10 CV is designed to accommodate standard mill and ribbon wound coils of steel strap and polyester strap for reliable, high speed strapping applications.

The brake attachments are a great safety feature – the first brake is for strap removal from disk and second brake for front wheel immobilization during tool operation.
