

# Serving the PACKAGING INDUSTRY Worldwide

Signode, a business unit of Signode Industrial Group, is a multinational manufacturer of packaging products with a firm commitment to R&D and an enviable reputation of working with customers to save millions in material and labour. Signode develops products that have been engineered specifically for your application and systems that protect your products, streamline your production and improve your profits.

At Signode, our people understand the challenges involved in getting products of diverse industries to domestic and international markets and continuously develop innovative, cost effective and value added Packaging Solutions for industry specific applications. To address special needs of niche industries, we have dedicated business units - field engineering, marketing, sales, service and support functions for the development and delivery of industry-specific packaging solutions.
